A Message from **OUR TRUSTEE**

Dear Friends, Supporters, and Champions of Hope,

I find myself overwhelmed with gratitude—for the lives we've touched, the barriers we've broken, and the unshakable spirit of humanity that connects us all. Care Guru Foundation began in 2022 with a simple belief: "No child should lose their smile to a disease they didn't choose, no family should collapse under the weight of unaffordable care, and no community should be left behind". This year, we've carried that belief louder and stronger than ever.

In a country where families shoulder 61% of healthcare costs out of pocket, and where the doctor-to-patient ratio stands at 1:1511—far from the WHO's recommended 1:1000—we've tried to be the bridge. Together, we've supported over 500 critical cases, planted 200,000 trees to restore our environment, and brought health awareness to rural communities through countless camps. But numbers alone never tell the full story — it is the faces, the courage, and the journeys behind them that truly define impact.

Take little Ridhay, a six-month-old fighter from Mumbai bravely battling SMA Type 1. His journey brought together thousands of compassionate individuals who stood by him in his fight to access life-saving gene therapy.

Or Jaishvi Yadav, now a joyful one-year-old, stable and thriving after an extraordinary outpouring of collective support made her treatment possible. These are not just milestones in a report — they are living reminders of what compassion in action can truly achieve.

As an ISO 9001:2015 certified foundation, we are committed not just to helping, but to healing. And none of this would be possible without you. Thank you for being the heartbeat of this mission. Together, we are showing the world that timely care is not a privilege—it is a lifeline.

With deepest hope,

Vikas Kaul
Trustee, Care Guru Foundation

OUR VISION

We envision a world where no one is held back by illness—where cancer and other life-threatening diseases are preventable, detectable, and beatable for all. At **Care Guru Foundation**, we believe that every individual deserves the right to a healthy, fulfilled life—regardless of background or circumstance.

Our vision is a future where universal healthcare and education is not a privilege but a promise, and where every person can access compassionate, world-class care and fight disease with dignity, strength, and hope.

Goals:

Spreading cancer awareness, facilitating critical & curative screening & care.

Collaboration with the network of hospitals, schools, trusts & foundation, thus creating a wide network to serve the underserved with financial aid for holistic healthcare, education & sustainability.

Making critical & curative care treatments available to poor patients who don't undergo any treatments for the lack of funds.

OUR MISSION

To provide holistic support in healthcare, education and social welfare for underprivileged communities.

INDIA'S HEALTHCARE REALITY

WHY OUR WORK MATTERS

For millions of families in India, falling ill is not just a health concern. It is a life-altering crisis.

Despite being one of the fastest-growing economies in the world, **India spends only 2.1% of its GDP on public healthcare.** For those living in rural and underserved areas, this gap is felt every day—in long travel distances, crowded hospitals, and delayed or missed treatment.

Families face a harsh reality:

- One doctor for every 1,511 people, far below the WHO-recommended ratio.
- Overburdened public hospitals struggling with limited infrastructure.
- Late diagnosis that turns manageable conditions into medical emergencies.
- Little to no access to specialised care.
- Inability to afford treatment for critical illnesses or rare diseases.

When care is delayed, the cost is often a life.

For parents of critically ill children, cancer patients, and families facing rare diseases, the system offers few safety nets. High treatment costs and lack of timely support leave many with no choice but to wait—often when waiting is not an option.

This is where Care Guru Foundation steps in.

We work alongside hospitals, doctors, and communities to bridge the gap between diagnosis and treatment. By supporting timely medical care, facilitating access to specialists, and easing the financial burden on families, Care Guru Foundation reaches those who are otherwise left behind.

Our work exists for one reason:

No one should suffer or lose their life because help did not arrive in time.

THE COST OF CRITICAL CARE IN INDIA

When Treatment Costs Decide Survival

CANCER CARE

Families face medical bills between

₹5–27.5 lakhs

for advanced treatment.

Most sell assets or take loans, yet still fall short.

CHILD CRITICAL CARE

Therapies often cost

₹5–20 lakhs

emotionally and financially draining parents.

RARE DISEASES

Life-saving therapies cost

₹5–10 crore

a year — unreachable
for middle/lower-income families.

RARE DISEASES IN INDIA

The Silent Crisis No One Talks About

Rare diseases may be uncommon by definition—but in India, their impact is anything but small.

There is no single global definition for rare diseases. In India, they are identified as conditions affecting **fewer than 1 in 2,500 individuals**. Yet, when viewed collectively, an estimated **8 to 10 crore Indians** are living with rare diseases—and **nearly 75% of them are children**.

For most families, the journey begins with uncertainty. Symptoms are subtle, misunderstood, or ignored for years. By the time a diagnosis is made, the condition has often progressed making treatment more complex, more urgent, and far more expensive.

Access to care remains limited. Specialised treatment options are scarce, and in many cases, annual therapy costs can range from ₹5 to ₹10 crore. For families already struggling, these numbers are unimaginable. Savings are exhausted, loans pile up, and hope begins to fade. Behind every statistic is a child waiting for treatment, parents searching for answers, and families fighting a battle they never chose.

This is where Care Guru Foundation steps in.

Care Guru Foundation works to bring visibility to rare diseases—supporting early diagnosis, facilitating access to specialised care, and helping families navigate the financial and emotional weight of treatment. Through awareness, partnerships, and timely intervention, we strive to ensure that rarity does not mean neglect. Because no child should be forgotten simply because their illness is rare.

IMPACT & ACHIEVEMENTS

**Creating Change.
Saving Lives.
Strengthening Communities.**

Care Guru Foundation initiatives have:

- ☐ Supported lakhs of patients battling critical, curative, and rare diseases.
- ☐ Improved health indicators in rural communities.
- ☐ Empowered women & children.
- ☐ Strengthened environmental sustainability.
- ☐ Advanced community resilience and disaster preparedness.

THE IMPACT WE'RE CREATING

At **Care Guru Foundation**, we believe that no one should face illness alone—or be denied care because of where they come from or what they can afford. Through this initiative, we bring together generous donors, compassionate hospitals, and dedicated volunteers under one shared mission to ensure that every patient, especially those from underserved communities, receives **timely, dignified, and life-saving treatment**.

Today, our network spans over **300+ hospitals** across India—including respected institutions like **Apollo, Rajiv Gandhi Cancer, KEM, Tata Memorial** and many more. These partnerships are built on trust, transparency, and a shared commitment to healing. It's this integrity that has made us one of the most trusted healthcare NGOs in the country. We also recognize that healing is not just medical—it's emotional, cultural, and deeply personal. That's why we offer care that respects every individual's background, language, and lived experience. We acknowledge the inequalities that still exist in our healthcare system and work every day to bridge those gaps—with empathy, equity, and unwavering resolve. **Care Guru Foundation** has been doing sterling work in fighting critical & curative diseases across India. It has been and continues to be the beacon of hope for thousands of our poor cancer & critical diseases like **SMA** affected brethren. The extent of help required is phenomenal. Most of the patients come to us from all over the country and can't afford two meals a day. In such cases undergoing treatment is beyond their capacity.

The need of the hour is to come together from all walks of life, pool in our resources to battle this diseases and emerge victorious. We seek active support and assistance from individual donors, trusts, the corporate world, medical fraternity, hospitals, the government, education & health ministry, well-wishers, stakeholders and all related NGOs to help scale-up our activities.

Together, we're building a healthier India where cancer or curative disease is not a death sentence, and where every life is valued, protected, and empowered.

BENEFICIARIES SUCCESS STORIES

From Despair to Hope – Stories that Moved India

Baby Ayansh

18-month-old Baby Ayansh Madan, battling SMA Type 1, successfully received his life-saving gene replacement therapy. A powerful wave of collective support came together to make this treatment possible, giving him a renewed chance at a healthier future.

Baby Ridhay

Six-month-old Ridhay from Mumbai was diagnosed with Spinal Muscular Atrophy Type 1 (SMA1), a rare genetic disorder that weakens muscles and severely affects breathing. Zolgensma, a one-time gene therapy, offers hope for a healthier and stronger future.

An outpouring of collective compassion has come together to support his life-saving treatment. Until he can access the therapy, Ridhay relies on BiPAP support for breathing and continues Risdiplam, an expensive oral medication that only slows the progression of the disease temporarily.

Ridhay's story reflects the urgent need for collective kindness so he can receive Zolgensma before the age of two and move toward a healthier future.

Jaishvi Yadav

At just one year old, Jaishvi was diagnosed with Spinal Muscular Atrophy (SMA Type 1). An overwhelming wave of collective support came together to stand by her during this critical time. She successfully received Zolgensma gene therapy and is now stable, continuing with physiotherapy and ongoing medical care.

Her steady progress brings hope to families battling SMA and highlights the life-changing impact of timely intervention and compassionate support.

RARE DISEASE HEROES

Hilal Beating Hydrocephalus

Underwent critical VP shunt surgery with CGF support.

The sweet 6-month-old boy was robbed of his childhood by a medical condition called Hydrocephalus, a rare and dangerous disorder where excessive fluid accumulates in the brain. Initially, doctors advised against surgery as it could be life-threatening due to Hilal's young age.

When he turned 7, the doctors finally felt he was strong enough to undergo a Ventriculoperitoneal (VP) shunt procedure to drain the excess fluid from his brain. However, the cost of the treatment was far beyond his family's means, so they sought support to help cover the medical expenses.

With the help of generous donors, Hilal's life took a positive turn as his fundraiser, enabling him to receive the crucial treatment he needed.

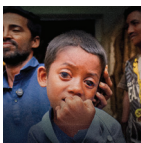

Fariha Shaikh

A Journey of Strength and Hope

Fariha Shaikh, a young child from Andhra Pradesh, was diagnosed with Gaucher disease — a rare genetic disorder caused by the accumulation of fatty substances in vital organs such as the liver and spleen. The condition required immediate and sustained medical intervention.

To manage her health and improve her quality of life, Fariha began Enzyme Replacement Therapy, administered through regular intravenous infusions. With timely medical care and structured treatment, she continues to fight her condition with remarkable resilience.

Fariha's journey reflects the importance of early diagnosis, consistent treatment, and collective support in managing rare diseases. We wish her continued strength, steady recovery, and unwavering support as she moves forward with hope.

STORIES IN FRAME

STORIES IN FRAME

OUR PROJECT

HEALTH

Health Interventions: Restoring Hope Through Critical Care.

Access to timely and quality healthcare continues to remain a privilege for many vulnerable families across India. For thousands of patients battling life-threatening illnesses such as **cancer, organ failure, rare diseases like Spinal Muscular Atrophy (SMA), and other critical conditions**, the greatest challenge is not just the disease — but the **financial burden attached to survival**.

During the year, our health interventions focused on bridging this critical gap between **medical urgency and financial capacity**, ensuring that no life is lost due to lack of funds. Through a combination of donor support, hospital partnerships, and structured case verification, we enabled patients to access life-saving treatments when they needed it the most.

Our approach is simple yet powerful:
Identify. Verify. Mobilize. Support. Heal.

We supported patients across categories including:

- **Cancer treatments** (Chemotherapy, Radiation, Surgery, Immunotherapy)
- **Organ transplants and post-transplant care**
- **Rare diseases including Spinal Muscular Atrophy (SMA)**
- **Cardiac surgeries and intensive care support**
- **Accident and emergency trauma care**

Each case represents a family pushed to the brink by medical expenses — and brought back to hope through timely intervention.

Cancer Care: Fighting More Than a Disease.

Cancer remains one of the leading causes of catastrophic health expenditure in India. Beyond the physical pain, families endure emotional trauma and financial devastation. Treatment often requires multiple cycles of chemotherapy, radiation, surgery, diagnostic tests, and long hospital stays, pushing families into debt or forcing them to discontinue treatment midway.

This year, a significant portion of our health support was directed toward **cancer patients from economically weaker backgrounds, enabling them to:**

- Complete planned chemotherapy and radiation cycles
- Undergo critical cancer surgeries
- Manage diagnostic and hospitalization costs
- Continue post-treatment recovery and monitoring

Our partnerships with hospitals and oncologists ensured that patients received timely admissions and continuity in care without delays caused by financial constraints.

For many beneficiaries, this support meant the difference between **treatment abandonment and a fighting chance at survival.**

Critical Care: Intervening at the Most Urgent Hour.

Medical emergencies do not come with warnings. Road accidents, cardiac arrests, organ failures, complicated deliveries, neonatal complications, and sudden infections often require immediate ICU admissions and expensive life support systems.

Families are forced to arrange large sums within hours — a near impossible task for daily wage earners and low-income households.

Through our critical care assistance, we were able to:

- Facilitate emergency ICU admissions
- Support ventilator and life support expenses
- Enable urgent surgeries and trauma care
- Assist neonatal and pediatric intensive care cases
- Support patients requiring organ transplants and dialysis

In these moments, **time is life.** Rapid financial assistance ensured that treatment decisions were based on medical need, not monetary limitation.

Spinal Muscular Atrophy (SMA): Supporting Rare Disease Warriors.

Spinal Muscular Atrophy (SMA) is a rare genetic disorder that primarily affects infants and young children, leading to progressive muscle weakness and, in severe cases, respiratory failure. The treatment for SMA is among the most expensive in the world, placing it completely out of reach for most families.

This year, we extended focused support to children diagnosed with SMA by helping families mobilize funds for:

- High-cost life-saving injections and gene therapy
- Respiratory support and medical equipment
- Long-term medical management and physiotherapy
- Hospitalization and supportive care

For parents, this support translated into something priceless — **time, survival, and hope for their child's future.**

A Structured and Transparent Support System

Every medical case supported during the year went through a rigorous verification process including:

- Medical document validation by experts
- Hospital cost estimates and treatment plans
- Background checks to assess genuine financial need
- Continuous coordination with hospitals and families

This ensured that donor contributions directly translated into genuine, high-impact medical support with complete transparency and accountability.

Beyond Treatment: Restoring Dignity to Families.

Health crises affect more than the patient — they affect entire families emotionally, socially, and financially. By stepping in at the right time, we not only supported medical treatment but also:

- Prevented families from falling into long-term debt
- Reduced treatment drop-out rates
- Enabled patients to focus on recovery rather than pleading finances
- Restored dignity and hope during their most vulnerable phase

Healthcare is not just about curing diseases.

It is about ensuring that survival is not determined by affordability.

OUR PROJECT

SUSTAINABILITY

ENVIRONMENT INITIATIVE | Tree Plantation Drive – Odisha & Jharkhand.

As part of our long-term commitment to environmental sustainability, large-scale tree plantation drives were undertaken in Chandigarh and Jharkhand. These initiatives aimed to restore green cover, improve air quality, and contribute to climate resilience in both urban and semi-urban regions.

A total of over 2 lakh native and climate-resilient saplings were planted with the support of local communities, volunteers, and partner organizations to ensure long-term survival and ecological balance. Alongside the plantation drives, awareness sessions were conducted to educate communities on the importance of nurturing trees and preserving local biodiversity.

These efforts represent a meaningful step toward creating greener landscapes and a healthier environment for future generations.

Disaster Relief & Humanitarian Response.

In Punjab, lives changed within minutes. Heavy rains and landslides swept away homes, shops, and roads, leaving families exposed to the elements and uncertain about the future. Many survivors were left without shelter, belongings, or access to basic necessities.

Mothers searched for their children in the chaos. Elderly parents stood before the remains of what was once their home. Children faced hunger and thirst as families struggled to secure even a single meal.

In the immediate aftermath, the needs were simple yet urgent: food to ease hunger, clean drinking water to prevent disease, temporary shelter to withstand continuing rains, and essential medicines for the injured and unwell.

Care Guru Foundation mobilized rapid relief efforts on the ground to support affected communities. The focus was clear — ensure that no one went hungry, thirsty, or without medical attention during the crisis.

Through coordinated action, Care Guru Foundation facilitated:

- Distribution of cooked meals and dry ration kits
- Access to safe drinking water
- Temporary shelter materials for displaced families
- Basic medical support and essential medicines

A plate of food, a bottle of clean water, a protective roof, and timely care became symbols of hope and survival for those who had lost everything.

This response was made possible through the collective support of partners and donors who stood by communities in their most vulnerable moments, helping restore dignity, safety, and the first steps toward recovery.

Climate Change, Pollution & Waste Management Initiatives.

Recognizing the urgent challenges posed by climate change and rising pollution levels, we have integrated environmental responsibility into our program approach through the following initiatives:

- Awareness campaigns on climate change, air pollution, and sustainable living practices
- Community engagement programs promoting waste segregation and responsible disposal
- Garbage detection and cleanliness drives in public spaces to reduce environmental hazards
- Promotion of the **3R principle – Reduce, Reuse, Recycle** at community and institutional levels
- Encouraging plantation and green practices to offset carbon impact
- Educating school children and local communities on environmental stewardship

These initiatives are designed not only to address immediate environmental concerns but also to foster long-term behavioural change toward a cleaner, greener, and more sustainable future.

OUR PROJECT

EDUCATION | New addition to our programs

Scholarship Support – Lighting the Path to Tomorrow.

Education is the most powerful weapon to break the chains of poverty. Through our **Scholarship Support** program, we ensure no deserving child from underserved or vulnerable communities ever has to drop out of school due to money problems.

We cover **school fees, uniforms, books, examination fees, and transportation** removing every financial roadblock so children can focus on learning, not worrying.

More than funding books, we're **funding dreams**, restoring hope, and giving families the security and confidence they need. Because when a child stays in school, an entire future lights up.

Learning Aids for Children – Equipping Young Minds to Shine.

In many marginalized communities, children are full of potential but held back by the lack of basic learning tools. Without notebooks, bags, or proper stationery, even the brightest minds struggle to participate and learn effectively.

We provide comprehensive **learning aids** including school bags, notebooks, stationery kits, educational charts, digital learning resources, and age-appropriate study materials. These essential tools help children engage actively in class, improve concentration, develop curiosity, and build strong learning habits from the start.

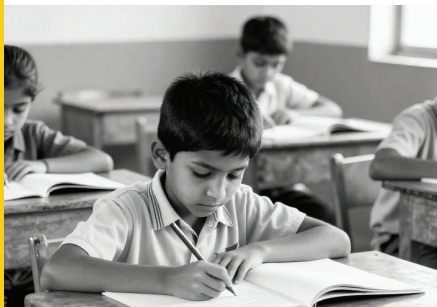

By putting the right tools in their hands, we strengthen their academic foundation and open the door to confidence, success, and a lifelong love for learning.

Boosting Environmental Literacy – Growing Green Guardians for Tomorrow.

In a world facing urgent climate challenges, environmental awareness is essential for building a sustainable future. Through our **Boosting Environmental Literacy** program, we empower children to become responsible stewards of the planet by weaving environmental education into their everyday learning.

We engage young minds through hands-on **tree plantation drives, awareness workshops, eco-club activities, and practical field experiences.** Children learn critical topics such as climate change, waste management, water conservation, and biodiversity — turning knowledge into action and fostering a deep love for nature.

By nurturing eco-conscious habits from an early age, we are shaping informed, sensitive, and proactive future leaders who will protect and preserve our planet for generations to come.

INDEPENDENT AUDITORS' REPORT

The Members of

CARE GURU FOUNDATION

Report on the Audit of Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of **CARE GURU FOUNDATION** ("the Trust"), which comprise the Balance Sheet as at 31st March, 2025, and the Statement of Income & Expenditure Account for the year ended on that date, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Trust Act, 1982, in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Trust as at 31st March, 2025, and its surplus for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified of the Act (SAs). Our responsibilities under these Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements section of our report. We are independent of the Trust in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

- All the data and information provided by Management is Subject to confirmation and reconciliation. Observation pertaining to the previous year remains subject to compliance.

Information Other than the Financial Statements and Auditor's Report Thereon

The Trustee is responsible for the other information. The other information comprises the information included in the report on Trustee information, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent.

Our PAN No. AAAPF7511L, GSTIN 07AAAPF7511J23

e-mail: ckschoudhary@gmail.com, kschoudhary51@gmail.com

3, VEER SAVARKARBLOCK,
SHAKARPUR, DELHI - 110092
PIN-011-22528739, 42444729

- Conclude on the appropriateness of management's use of the going concern basis of accounting unless, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Trust's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Trust to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Trustee is responsible for the matters stated in the Trust Act, 1982 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position and financial performance of the Trust in accordance with the AS and other accounting principles generally accepted in India specified in the Act. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Trust and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Trust's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Trust or to cease operations, or has no realistic alternative but to do so.

The Trustee is also responsible for overseeing the Trust's financial reporting process.

Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

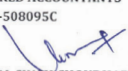

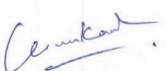

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. We are also responsible for expressing our opinion on whether the Trust has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.

FUTURE DIRECTIONS.

Care Guru Foundation remains committed to:

- ▣ Climate-responsive health strategies.
- ▣ Expansion of digital health.
- ▣ Strengthening rural health systems.
- ▣ Scaling SMA & rare disease access.
- ▣ Building strong partnerships with schools to support education.

For too many families, a health concern turns life-threatening—not because treatment doesn't exist, but because it arrives too late, too far away, or at a cost they cannot bear.

At **Care Guru Foundation**, we work to change that—quietly, responsibly, and with urgency. One patient. One family. One life at a time.

“Bridging the gap between illness and hope”
